

# Sistema de Sinalização

**Hospital Geral de Luís Eduardo Magalhães - HGLEM**

Design é **criar soluções** eficazes e pensadas para os problemas do dia a dia.

O designer precisa entender o problema, considerando o cliente, o negócio, o mercado, os objetivos e, principalmente, o público-alvo. Depois, criar um plano para solucioná-lo, levando em conta aspectos técnicos, econômicos, estéticos, antropológicos, etc.

Design entrega **valor**.

Queremos mais do que orientar através dos sinais visuais.

Queremos fazer dos ambientes e dos caminhos que

levam até eles, uma experiência agradável.

**Mais humana. Mais viva.**

## Hospital Geral de Luís Eduardo Magalhães - HGLEM

---

A concepção do projeto de Sinalização do Hospital Geral de Luís Eduardo Magalhães foi feita a partir da ideia de uma comunicação hospital/paciente mais humanizada, facilitando a circulação e entendimento dos espaços.

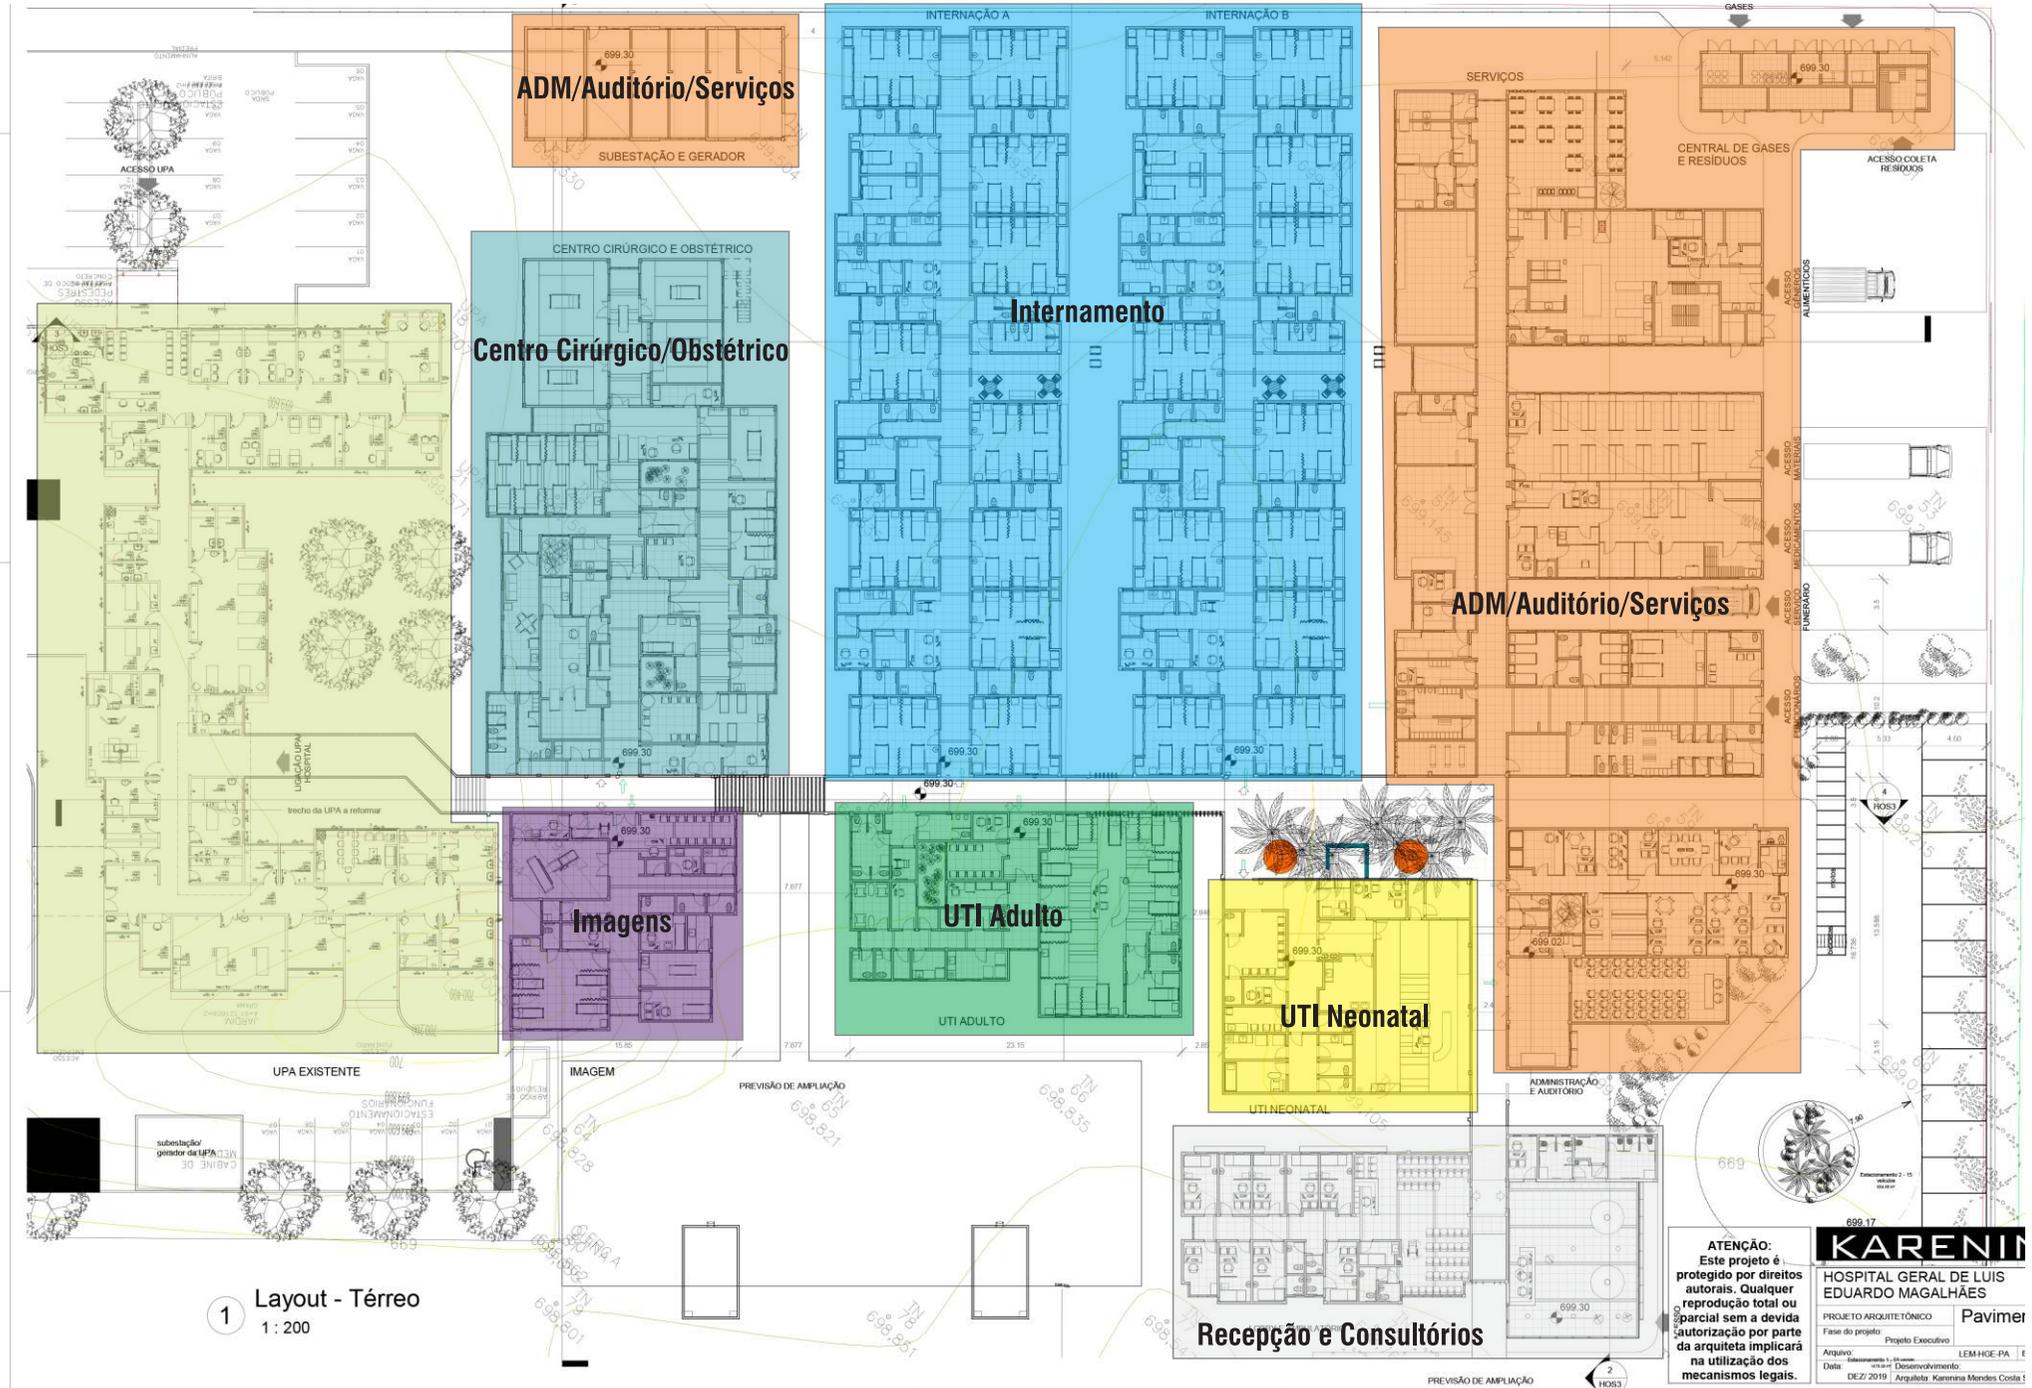

Escolhemos um elemento do cerrado, sendo a cidade a representante deste tipo de bioma da Bahia. A árvore foi escolhida como elemento simbólico e visual para a sinalização, justamente porque expande sua copa até o céu e mergulha suas raízes no solo, fazendo a ligação corpo e alma. Universalmente são tidas como símbolo da vida e portanto são uma representação simbólica do psiquismo humano.

Todas as informações contidas aqui neste caderno precisam ser verificadas e passar por um agente de saúde para validar a nomenclatura dos espaços. Além disso as medidas precisam ser conferidas no local.
